Hello,

I live fairly close to this RV "village" and am very concerned about what I read yesterday. Is it true you want to extend this by 2 YEARS? After promising and reiterating many times last December that it would be for only ONE?

Has anyone seen the garbage, grocery carts and other items accumulating around this area? I have, and have also seen members of the community picking it up. They shouldn't need to do that!

My husband and I used to walk through the alley way from Norlee towards 116. We no longer do this after more than a few times, there were unhoused people there yelling, camping, and rummaging through the garage. No - they might not have been from across the street, but there is a definite increase of people and garbage there. Also the area behind the business where the Ceres garden was. There are encampments there that I have seen. People who live near the village say they hear yelling and fighting nightly.

Anyway - I hope this is just a rumor about the 2 more years. We know people who are moving from the area because they no longer feel comfortable here. We could be next.

Thank you for reading.
